

Faiz Mazlan

Cloud Architect

📍 Kuala Lumpur, Malaysia ✉ faiz.mazlan@outlook.com ☎ 019-911 0905 🌐 faizmazlan.github.io 🌐 faizmazlan

Summary

Cloud Architect with 15+ years in enterprise IT, progressing from database administration and Unix engineering to cloud architecture at PETRONAS Digital. Led migration of 20+ applications to AWS within 50 days and architected multi-region landing zones across AWS and Azure. Skilled in Terraform, Infrastructure as Code, cloud governance, and FinOps. Combines deep hands-on technical expertise with project management capability to drive cloud transformation programmes at scale.

Experience

PETRONAS Digital, Cloud Architect

Kuala Lumpur, Malaysia

- Defined enterprise cloud reference architectures and governance frameworks adopted across 5+ business units, improving standardisation and reducing provisioning lead time by 40%
- Led technical delivery of AWS Malaysia Repatriation project, architecting the Malaysia region landing zone to ensure data sovereignty and regulatory compliance
- Evaluated and adopted cloud-native technologies including Terraform modules, AWS Control Tower, and Azure Policy, accelerating delivery timelines by 30%
- Established foundational cloud infrastructure including networking, security guardrails, IAM policies, and multi-account governance for the Malaysia region

Jan 2024 – present
2 years 4 months

PETRONAS Digital, Senior Cloud Engineer

Kuala Lumpur, Malaysia

- Migrated 20 applications to AWS within 50 days as part of the Cloud Transformation Programme, achieving zero unplanned downtime
- Architected and deployed AWS Landing Zone (Singapore) with multi-account strategy, networking, security guardrails, and governance controls
- Deployed Azure Landing Zone (Singapore) using Microsoft Cloud Adoption Framework, extending PETRONAS to a multi-cloud environment
- Automated infrastructure provisioning using Terraform and CI/CD pipelines, reducing deployment time from days to hours
- Delivered a cloud self-service portal enabling teams to provision resources on-demand, cutting provisioning lead time by 60%

Jan 2019 – Dec 2023
5 years

PETRONAS ICT, Senior Unix Engineer

Kuala Lumpur, Malaysia

- Maintained and hardened 50+ enterprise Unix/Linux servers, achieving 99.9% uptime through proactive capacity planning and incident response
- Executed major OS upgrades and security patch cycles across production systems, reducing vulnerability exposure by 70%

Jan 2016 – Dec 2018
3 years

iPerintis, Senior Database Administrator

Kuala Lumpur, Malaysia

- Managed SQL Server databases for enterprise SAP landscapes, owning patching, backup strategies, performance tuning, and capacity forecasting
- Introduced proactive monitoring and automated alerting, reducing database-related incidents by 40% and improving mean time to resolution

Apr 2012 – Dec 2015
3 years 9 months

Columbia Asia, Database Administrator

- Administered SQL Server operations for the CARE21 Hospital Information System, supporting clinical and administrative workflows for 10+ hospitals
- Performed database development, patch management, and query optimization, improving system responsiveness by 25%

Selangor, Malaysia

May 2010 – Mar 2012

Skills

Cloud Platforms: AWS (VPC, EC2, RDS, S3, IAM, Lambda, Landing Zone, Control Tower, CloudFormation, Organizations), Microsoft Azure (Management Groups, Azure Policy, Hub-Spoke Networking, Azure DevOps)

Infrastructure as Code: Terraform (modules, state management, S3 backend, DynamoDB locking), Azure CAF Launchpad, CloudFormation, CI/CD pipeline integration

Cloud Architecture: Landing zone design, multi-account strategy, security guardrails, governance frameworks, multi-cloud strategy, hub-spoke networking

Cloud Migration & Repatriation: Workload migration, data sovereignty, regulatory compliance, application cutover planning, lift-and-shift, re-platforming

Cloud FinOps: Cost allocation, chargeback reporting, tagging compliance enforcement, resource inventory, billing optimization

Project Management: End-to-end delivery, cross-functional team coordination, stakeholder engagement, vendor management, risk mitigation, Agile/Scrum

Systems & Databases: Unix/Linux administration, SQL Server (SAP environments), performance tuning, backup/recovery, monitoring

Certifications

Microsoft Certified: Azure Architect Technologies

Feb 2021

Microsoft Certified: Azure Administrator Associate

Jan 2020

Microsoft Certified: Azure Fundamentals

Aug 2022

Microsoft OpenHack: DevOps

May 2022

Microsoft OpenHack: Serverless

Nov 2022

Scrum.org: Professional Scrum Master I (PSM I)

Aug 2024

Education

Bachelor Universiti Teknologi MARA, Information System Engineering

Selangor, Malaysia

May 2005 – May 2008

Projects

AWS Malaysia Repatriation

Jan 2026

Technical Lead for AWS workload repatriation to Malaysia region

- Led technical delivery architecting and deploying the Malaysia landing zone for data sovereignty and regulatory compliance
- Established foundational infrastructure including networking, security guardrails, IAM policies, and multi-account governance
- Coordinated workload migration strategy to repatriate cloud resources from overseas regions

SkyLedger

May 2025

Project Manager & Lead Developer for cloud tagging and billing inventory application

- Delivered SkyLedger as a tagging improvement initiative, strengthening cloud cost governance across multiple accounts
- Built automated tag enforcement, validation, and remediation workflows improving tagging compliance
- Developed centralized billing and resource inventory platform enabling accurate cost allocation and chargeback reporting

AWS Infrastructure Automation with Terraform

Mar 2024

End-to-end cloud infrastructure provisioning using Terraform on AWS

- Designed IaC using Terraform to provision AWS resources including VPC, EC2, RDS, S3, and IAM
- Built reusable Terraform modules for standardized deployment across dev, staging, and production environments
- Implemented state management with S3 backend and DynamoDB locking for team collaboration

Microsoft Cloud Adoption Framework — Azure Landing Zone

Feb 2023

Azure IaC landing zone deployment in collaboration with Microsoft

- Pioneered Microsoft Cloud Adoption Framework adoption, aligning enterprise cloud strategy with CAF best practices
- Deployed Azure IaC-based landing zone and launchpad for Singapore region with policy-driven templates

AWS Landing Zone (Singapore)

Mar 2020

Enterprise-scale AWS landing zone for PETRONAS Cloud Transformation Programme

- Architected and deployed AWS Landing Zone in Singapore with multi-account strategy and governance controls
- Migrated 20 applications within 50 days ensuring minimal downtime and business continuity

Cloud Self-Service Portal

Dec 2021

Project Manager for internal cloud self-service portal

- Led end-to-end project delivery coordinating cross-functional teams across development, infrastructure, and security
- Delivered self-service portal reducing provisioning lead time and manual overhead
