

Faiz Mazlan

Cloud Architect

📍 Kuala Lumpur, Malaysia ✉ faiz.mazlan@outlook.com ☎ 019-911 0905 🌐 faizmazlan.github.io 🌐 faizmazlan

Summary

Cloud Architect with 15+ years in enterprise IT, progressing from database administration and Unix engineering to cloud architecture at PETRONAS Digital. Proven track record leading cloud migrations, building Infrastructure as Code pipelines, and delivering internal platforms. Combines deep hands-on technical expertise with project management capability to drive cloud transformation programmes at scale.

Experience

PETRONAS Digital , Cloud Architect - Spearheaded enterprise cloud architecture strategy, defining reference architectures and governance frameworks to drive scalability and resilience - Evaluated and adopted emerging cloud-native technologies, accelerating delivery time-lines and reducing operational complexity across business units	Kuala Lumpur, Malaysia Jan 2024 – present 2 years 4 months
PETRONAS Digital , Senior Cloud Engineer - Engineered and operated production cloud workloads, automating infrastructure provisioning and achieving measurable gains in deployment speed and system uptime - Drove large-scale cloud migration initiatives, partnering with application, security, and networking teams to deliver seamless cutover with zero unplanned downtime	Kuala Lumpur, Malaysia Jan 2019 – Dec 2023 5 years
PETRONAS ICT , Senior Unix Engineer - Maintained and hardened enterprise Unix environments, delivering consistent uptime through proactive capacity planning and incident response - Executed major OS upgrades and security patch cycles across production systems, strengthening compliance posture and reducing vulnerability exposure	Kuala Lumpur, Malaysia Jan 2016 – Dec 2018 3 years
iPerintis , Senior Database Administrator - Managed SQL Server databases underpinning enterprise SAP landscapes, owning patching schedules, backup strategies, performance tuning, and capacity forecasting - Introduced proactive monitoring and automated alerting, cutting database-related incidents and improving mean time to resolution	Kuala Lumpur, Malaysia Apr 2012 – Dec 2015 3 years 9 months
Columbia Asia , Database Administrator - Owned SQL Server operations for the CARE21 Hospital Information System, supporting clinical and administrative workflows - Performed database development, patch management, and query optimization to maintain system responsiveness and data integrity	Selangor, Malaysia May 2010 – Mar 2012 1 year 11 months

Education

Bachelor Universiti Teknologi MARA , Information System Engineering - Thesis: CMMI Software Management - Advisor: Prof. Naim	Selangor, Malaysia May 2005 – May 2008
---	---

Projects

AWS Malaysia Repatriation

Jan 2026

Technical Lead for AWS workload repatriation to Malaysia region

- Led the technical delivery of the AWS Malaysia Repatriation project, architecting and deploying the Malaysia landing zone
- Established foundational cloud infrastructure in the Malaysia region including networking, security guardrails, IAM policies, and multi-account governance
- Coordinated workload migration strategy to repatriate cloud resources from overseas regions, ensuring data sovereignty and regulatory compliance

SkyLedger

May 2025

Project Manager & Lead Developer for cloud tagging improvement and billing inventory application

- Served dual role as Project Manager and Lead Developer, delivering SkyLedger as a key tagging improvement initiative to strengthen cloud cost governance
- Improved tagging compliance across cloud accounts by building automated tag enforcement, validation, and remediation workflows
- Developed a centralized billing and resource inventory platform, enabling accurate cost allocation, chargeback reporting, and asset visibility

AWS Infrastructure Automation with Terraform

Mar 2024

End-to-end cloud infrastructure provisioning and management using Terraform on AWS

- Designed and implemented Infrastructure as Code (IaC) using Terraform to provision and manage AWS resources including VPC, EC2, RDS, S3, and IAM
- Built reusable Terraform modules for standardized deployment across multiple environments (dev, staging, production)
- Implemented state management with S3 backend and DynamoDB locking for team collaboration
- Automated CI/CD pipeline integration with Terraform plan and apply stages for infrastructure changes

Microsoft Cloud Adoption Framework — Azure IaC Landing Zone & Launchpad

Feb 2023

Pioneered Microsoft Cloud Adoption Framework adoption in close collaboration with Microsoft to deploy Azure IaC landing zone and launchpad

- Pioneered the adoption of Microsoft Cloud Adoption Framework (CAF), working closely with Microsoft to align enterprise cloud strategy with CAF best practices
- Deployed Azure IaC-based landing zone and launchpad for the Singapore region, automating foundational infrastructure provisioning with repeatable, policy-driven templates
- Established enterprise-scale governance, identity, and connectivity baselines in partnership with Microsoft engineering, accelerating workload onboarding

Azure Landing Zone (Singapore) — PETRONAS

Dec 2022

Greenfield Azure landing zone deployment in Singapore region for PETRONAS multi-cloud strategy

- Architected and deployed a new Azure Landing Zone in the Singapore region, extending PETRONAS cloud footprint to a multi-cloud environment
- Designed core platform infrastructure including management groups, subscriptions, networking (hub-spoke), and Azure Policy guardrails
- Enabled application teams to onboard workloads with standardized governance, identity, and connectivity baselines

AWS Landing Zone (Singapore) — PETRONAS Cloud Transformation Programme

Mar 2020

Enterprise-scale AWS landing zone deployment for PETRONAS cloud migration initiative

- Architected and deployed AWS Landing Zone in Singapore region as part of the PETRONAS Cloud Transformation Programme
- Successfully migrated 20 applications to AWS within 50 days, ensuring minimal downtime and business continuity
- Established foundational cloud infrastructure including multi-account strategy, networking, security guardrails, and governance controls

Cloud Self-Service Portal

Dec 2021

Project Manager for internal cloud self-service portal enabling automated resource provisioning

- Led end-to-end project delivery as Project Manager, coordinating cross-functional teams across development, infrastructure, and security
- Delivered a self-service portal enabling teams to provision cloud resources on-demand, reducing provisioning lead time and manual overhead
- Managed project timeline, stakeholder communication, risk mitigation, and vendor coordination to ensure on-time delivery

Skills

Cloud Platforms: AWS (VPC, EC2, RDS, S3, IAM, Landing Zone, Control Tower), Microsoft Azure (Management Groups, Azure Policy, Hub-Spoke Networking)

Infrastructure as Code: Terraform (modules), Azure CAF Launchpad, tagging validation, Azure DevOps vending, automation, CI/CD pipeline integration

Cloud Architecture: Landing zone design, multi-account strategy, security guardrails, governance frameworks, multi-cloud strategy

Cloud Migration: Workload migration, repatriation, data sovereignty, regulatory compliance, application cutover planning

Cloud FinOps: Billing tagging, cost allocation, chargeback reporting, tag compliance enforcement, resource inventory

Project Management: End-to-end delivery, cross-functional team coordination, stakeholder engagement, vendor management, risk mitigation

Systems & Databases: Unix/Linux administration, SQL Server (SAP environments), performance tuning, backup/recovery

Certifications

Microsoft Certified: Microsoft Azure Architect Technologies

Feb 2021

Microsoft Certified: Azure Administrator Associate

Jan 2020

Microsoft Certified: Azure Fundamentals

Aug 2022

Microsoft OpenHack: DevOps

May 2022

Microsoft OpenHack: Serverless

Nov 2022

Scrum.org: Professional Scrum Master I (PSM I)

Aug 2024
