

Faiz Mazlan

Cloud Strategy Manager

📍 Kuala Lumpur, Malaysia ✉ faiz.mazlan@outlook.com ☎ 019-911 0905 🌐 faizmazlan.github.io 🌐 faizmazlan

Summary

Cloud Strategy Manager with 15+ years of enterprise IT experience spanning database administration, Unix engineering, and cloud architecture at PETRONAS Digital. Drove large-scale application migrations, architected multi-region AWS and Azure landing zones, and now enabling AI technology adoption. Blends deep technical expertise with team leadership and end-to-end delivery to drive cloud transformation at scale

Experience

PETRONAS Digital, Cloud Strategy Manager

Kuala Lumpur, Malaysia

Jan 2024 – present

2 years 5 months

- Architected and deployed AWS and Azure landing zones across multiple regions, establishing multi-account governance, networking, security guardrails, and identity integration
- Spearheaded enterprise cloud architecture strategy, defining reference architectures and governance frameworks to drive scalability and resilience across 800+ cloud-hosted applications serving PETRONAS group-wide business
- Evaluated and adopted emerging cloud-native technologies, accelerating delivery timelines and reducing operational complexity across business units

PETRONAS Digital, Senior Cloud Engineer

Kuala Lumpur, Malaysia

Jan 2019 – Dec 2023

5 years

- Lead a team of cloud engineers focused on infrastructure orchestration and delivery, defining KPIs, managing performance, and ensuring alignment with departmental objectives
- Engineered and operated production cloud workloads across AWS and Azure, automating infrastructure provisioning and achieving measurable gains in deployment speed and system uptime
- Delivered end-to-end IaC pipelines using Terraform with reusable modules, centralized tagging validation, and CI/CD integration
- Drove large-scale cloud migration initiatives, partnering with application, security, and networking teams to deliver seamless cutover with zero unplanned downtime
- Built centralized billing inventory platforms, tag compliance enforcement, and reporting dashboards using KQL and Power BI

PETRONAS ICT, Senior Unix Engineer

Kuala Lumpur, Malaysia

Jan 2016 – Dec 2018

3 years

- Maintained and hardened enterprise Unix environments, delivering consistent uptime through proactive capacity planning and incident response
- Executed major OS upgrades and security patch cycles across production systems, strengthening compliance posture and reducing vulnerability exposure

iPerintis, Senior Database Administrator

Kuala Lumpur, Malaysia

Apr 2012 – Dec 2015

3 years 9 months

- Managed SQL Server databases underpinning enterprise SAP landscapes, owning patching schedules, backup strategies, performance tuning, and capacity forecasting
- Led migration and conversion of SAP ECC6 systems from DB2 hosted on IBM mainframe to Microsoft SQL Server
- Introduced proactive monitoring and automated alerting, cutting database-related incidents and improving mean time to resolution

Education

Bachelor	Universiti Teknologi MARA , Information System Engineering • Thesis: CMMI Software Management • Advisor: Prof. Naim	Selangor, Malaysia May 2005 – May 2008
-----------------	--	---

Projects

AWS AI Innovation Sandbox Architect for AWS AI Innovation Sandbox environment design • Designed a secure, isolated sandbox environment on AWS to enable rapid experimentation with AI and machine learning workloads to accelerate 100+ citizen developers and AI adopters across PETRONAS • Collaborated closely with Cyber Security and Enterprise Architecture teams to define security guardrails, cost governance, and policy enforcement	Mar 2026
AWS Malaysia Repatriation Technical Lead for AWS workload repatriation to Malaysia region • Led the technical delivery of the AWS Malaysia Repatriation project, architecting and deploying the Malaysia landing zone • Established foundational cloud infrastructure in the Malaysia region including networking, security guardrails, IAM policies, and multi-account governance • Coordinated workload migration strategy to repatriate cloud resources from overseas regions, ensuring data sovereignty and regulatory compliance	Dec 2025
SkyLedger Project Manager & Lead Developer for cloud tagging improvement and billing inventory application • Served dual role as Project Manager and Lead Developer, delivering SkyLedger as a key tagging improvement initiative to strengthen cloud cost governance • Improved tagging compliance across cloud accounts by building automated tag enforcement, validation, and remediation workflows • Developed a centralized billing and resource inventory platform, enabling accurate cost allocation, chargeback reporting, and asset visibility	May 2025
AWS Infrastructure Orchestration and Automation End-to-end cloud infrastructure provisioning and management using Terraform on AWS • Designed and implemented Infrastructure as Code (IaC) using Terraform to provision and manage AWS infrastructure • Built reusable Terraform modules for standardized deployment across multiple environments (dev, staging, production)	Mar 2024
Microsoft Cloud Adoption Framework — Azure IaC Landing Zone & Launchpad Pioneered Microsoft Cloud Adoption Framework adoption in close collaboration with Microsoft to deploy Azure IaC landing zone and launchpad • Pioneered the adoption of Microsoft Cloud Adoption Framework (CAF) and Azure Verified Module (AVM), working closely with Microsoft to align enterprise cloud strategy with CAF best practices • Deployed Azure IaC-based landing zone and launchpad for the Singapore region, automating foundational infrastructure provisioning with repeatable, policy-driven templates • Established enterprise-scale governance, identity, and connectivity baselines in partnership with Microsoft engineering, accelerating workload onboarding	Feb 2023

Azure Landing Zone (Singapore) — PETRONAS

Dec 2022

Greenfield Azure landing zone deployment in Singapore region for PETRONAS multi-cloud strategy

- Architected and deployed a new Azure Landing Zone in the Singapore region, extending PETRONAS cloud footprint to a multi-cloud environment
- Designed core platform infrastructure including networking, governance, and security guardrails
- Enabled application teams to onboard workloads with standardized governance, identity, and connectivity baselines

AWS Landing Zone (Singapore) — PETRONAS Cloud Transformation Programme

Mar 2020

Enterprise-scale AWS landing zone deployment for PETRONAS cloud migration initiative

- Architected and deployed AWS Landing Zone in Singapore region as part of the PETRONAS Cloud Transformation Programme
- Successfully migrated 20 applications to AWS within 50 days, ensuring minimal downtime and business continuity
- Established foundational cloud infrastructure including multi-account strategy, networking, security guardrails, and governance controls

Cloud Self-Service Portal

Dec 2021

Project Manager for internal cloud self-service portal enabling automated resource provisioning

- Led end-to-end project delivery as Project Manager, coordinating cross-functional teams across development, infrastructure, and security
- Delivered a self-service portal enabling teams to provision cloud resources on-demand, reducing provisioning lead time and manual overhead

Skills

Cloud Platforms: AWS, Azure

Infrastructure as Code: Terraform, Azure CAF Launchpad, Azure AVM, AWS Landing Zone and Centralized modules

Cloud Architecture: Landing zone design, multi-account strategy, security guardrails, governance frameworks, multi-cloud strategy, cost compression

Cloud Migration: Workload migration, repatriation, regulatory compliance, application cutover planning

Cloud FinOps: Billing tagging, cost allocation, chargeback reporting, tag compliance enforcement, resource inventory

Project Management: Team coordination, stakeholder engagement, vendor management, risk mitigation

Data & Analytics: Kusto Query Language (KQL), Azure Data Explorer, Power BI reporting

Scripting & Development: PowerShell, Bash, Python, Node.js, React

Virtualization: VMware vSphere, vCenter, RVTools

Automation & Orchestration: Tagging validation API, Azure DevOps vending, IAC CI/CD, Ansible

Systems & Databases: Unix/Linux administration, SQL Server (SAP environments), performance tuning, backup/recovery

Certifications

Scrum.org: Professional Scrum Master I (PSM I)

Aug 2024

Microsoft OpenHack: Serverless

Nov 2022

Microsoft OpenHack: DevOps

May 2022

Microsoft Certified: Microsoft Azure Architect Technologies

Feb 2021

Microsoft Certified: Azure Administrator Associate

Jan 2020
